Alpha Design Ltd, West Midlands, UK The Architectural Design Company – Alpha Design Ltd are multi disciplinary consultancy based in West Midlands. We can provide a professional, building design service from concept to completion for both Commercial and Residential developments. Our services can be tailored to suit your requirements, so you can use as much or as little of our experience in construction as desired. Our services have been driven by client requirements and range from –

- Feasibility and concept studies
- Planning application and building regulation approval drawings/specifications for residential and commercial developments
- Structural design and analysis
- Swept Path analysis
- Drainage design
- Computer visualisations
- Non Domestic Energy Performance certificates (EPCs)
- Dynamic thermal analysis
- SBEM, BREEAM and BREEAM in Use auditors

• Project procurement including tender, full specification We have huge experience working with a varied range of clients on many types of residential and commercial construction projects. Each project is bespoke, therefore a variety of solutions have been used to meet the clients requirements. We endeavour to support the clients brief through our flexible, proactive approach, being innovative and creative, increasing environmental sensitivity and supporting more sustainable building techniques to benefit the client and building users. Energy Assessment Energy Assessment services can be provided by us. Alpha Design Ltd can provide the

following services to meet your requirements as part of the building design service or as a stand alone assessment. • SBEM Calculations for Building Regulation approval. • BREEAM assessments for Offices, Retail and Industrial Buildings. • BREEAM in Use assessments for Environment impact review for existing buildings • Full thermal dynamic modelling to check for overheating and ventilation rates • SAP assessments for domestic buildings. • Non domestic Energy assessor status for the production of Energy Performance Certificates. Our experience in good energy efficient, sustainable design can help you save money in the long term. By using up to date modelling software we can undertake full dynamic thermal analysis of any building and check for daylighting savings, solar over heating, heating and cooling loads on a room by room basis etc. We provide all this information to ensure the clients ends up for the most energy efficient design for the price he wants to pay. Some of the Services we Offer Include: Architectural Design West Midlands • Planning Consultants West Midlands • Energy Assessors West Midlands • BREEAM West Midlands • Building Plans West Midlands • Architectural Design UK • Planning Consultants UK • Energy Assessors UK • BREEAM UK • Building Plans UK
