Equipment Safety The modern construction industry is continually being driven towards providing building excellence, meeting completion deadlines and operating within budget while ensuring that all current Health & Safety Legislation is observed and adhered to. In order to comply with this legislation, contractors are obliged to ensure that accidents on site are prevented. The most common cause of injury or death on any construction site is falling from height, with scaffolding and access equipment being under continuous scrutiny. George Roberts (N.W.) is now the U.K.'s leading supplier and distributor of Fall Prevention products for the scaffolding and access industry. We stock a large range of ladder safety gates for traditional Tube & Fitting and System Scaffold, our Ladder Safety Hatch being the ideal

method of preventing falls and falling objects through the ladder access point on working platforms. Scaffold Loading Bay Gates are essential on all sites where bricks and building materials are to be loaded onto the scaffold, all are supplied with double guardrail restraint to satisfy Health & Safety requirements. George Roberts (N.W.) Ltd. are a major distributor for both hire and sale of Combisafe Edge Protection which is geared in particular to the Formwork and Steel Erecting industries. Some of the Services we Offer Include: Scaffolding & Work Platforms UK • Tube & Tube Fittings UK • Safety Devices & Equipment UK • Scaffolding UK • Staging UK
